

BlinkerPaddle[®] LED-Enhanced Paddles

- Visible up to a mile away!
- Up to 20 hours of flashing on a single charge (rechargeable batteries and wall charger included)
- 3-way switch (one or both sides flashing)
- Automatic shut off when paddle is lowered below horizontal
- 18" size available with standard and custom legends

Patented TAPCO BlinkerSign[®] LED technology is used to make hand-held sign paddles more visible. Eight super-bright LEDs on each face match the BlinkerPaddle[®] background color and shape; LEDs flash in unison once per second. Flashing LEDs dramatically increase the paddle visibility so drivers can react sooner. A BlinkerPaddle[®] is especially effective in rain, fog, snow and low-light conditions.

BlinkerPaddle® Features

- Light-weight design (weighs less than 2 pounds) minimizes arm and wrist stress
- Thumb switch turns LEDs on for either (or both) sign faces
- LEDs automatically shut off when paddle is lowered below horizontal

Applications

- Flaggers
- Road crews
- Crossing guards
- Event parking

Accessories

- 1 Black Cordura nylon carrying case. Fits two 18" paddles and accessories.
- 2 Orange fiberglass staff, extends up to 9' 6".
- 3 Gray three-piece staff, 7' 2" when assembled.
- 4 Rubber base for orange or gray staffs. Allows for hands-free BlinkerPaddle® display and rotation.

Standard Specifications (subject to change without notice)

Sign Face

Sign Substrate	.040 high impact white Polystyrene
Reflective Sheeting	3M™ High Intensity Prismatic or DG3 Diamond Grade™
MUTCD Compliance	2009 MUTCD Section 6E.03 Retroreflectivity and Illumination

Batteries and Charging

Batteries	Three 1.2 volt rechargeable AA NiMH. 3.6 volts total. 1500 mAh capacity.
Battery Lifespan	Up to 5 years
Battery charging	120v AC wall charger

LEDs

Flash Pattern	Single flash, 60 flashes per minute
LED color	Amber, orange, red

Warranty

90 days from date of purchase
