

Mailbox Assemblies With V-Loc® Breakaway Anchors

Vehicular collisions with mailboxes on the roadside can produce severe injuries or fatalities. Old style brick and concrete mailbox supports are dangerous to motorists and pedestrian and are no longer deemed safe for use. TAPCO mailbox assemblies meet all US Post Office and Federal Highway pole breakaway standards. Each assembly is anchored with a TAPCO reusable V-Loc® breakaway anchor. Upon impact, the change in velocity of the vehicle is slight, and the danger of any part of the mailbox support penetrating the windshield of the vehicle is essentially eliminated. Installation is simple and in the event of knock-down, the system can be reset in minutes.

Multiple Mailbox Support

Consists of a thin-wall steel tube formed into a loop, mounting brackets, and V-Loc® breakaway anchor. Supports up to five mailboxes. Upon vehicular impact the tapered shape of the support causes the frame and mailboxes to be freed and projected upward and forward with only slight damage to the vehicle while preventing rapid deceleration.

Includes: 20-VR3 V-Loc®, 2" diameter 14 gauge formed pole, (5) mailbox mounting brackets for mounting (5) #1 or (4) #1A standard mailboxes (mailboxes not included). Weighs 26 lbs.

Includes V-Loc®
